CORR

Special glue application module for corrugated cardboards

Corrugated

KAS has developed the special module CORR for applying glue in corrugated cardboard machines. It consists of mechanical components that ensure the precise passage of the corrugated cardboard and a multiple gun head with 3 glue guns. With this glue head it is possible to apply the glue from above as well from below. The glue head is mechanically mounted in the CORR application module in such a way that both the angle of the glue head and the distance to the corrugated cardboard are optimally adjusted and so that the multi-valve glue head can be easily removed at any time.

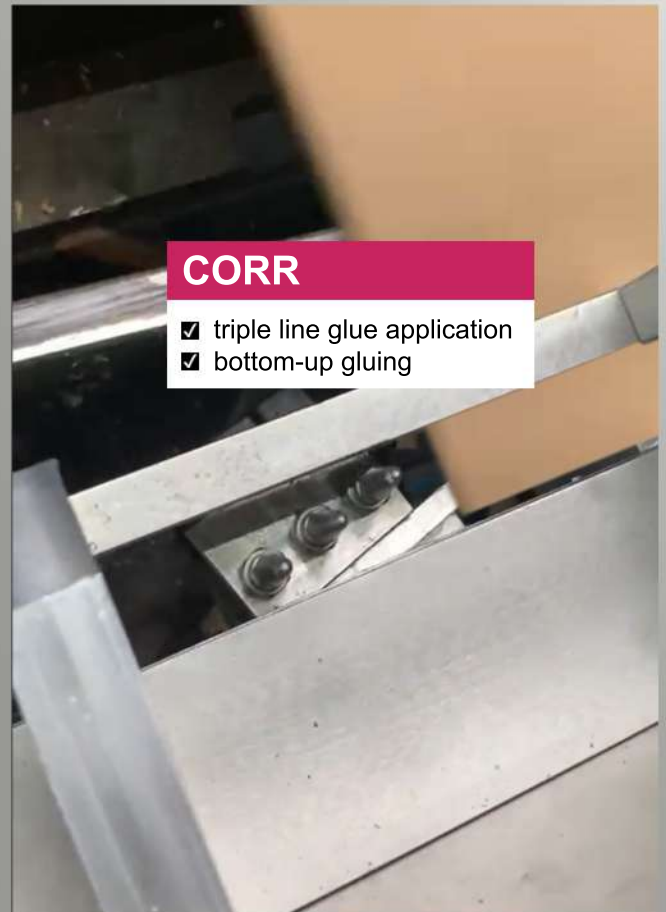

CORR

- ✓ triple line glue application
- ✓ dot mode

CORR

- ✓ triple line glue application
- ✓ triple glue check

CORR

- ✓ triple line glue application
- ✓ bottom-up gluing
